Visit <http://ohioaccmeetings.org/am/poster/> for submission details.

All current Ohio fellows in an Ohio cardiology training program are invited to present their research (past or present) during the poster session, scheduled for Saturday, October 15. Eligible posters may present recent data, case study* or information that has been presented previously at a local or national meeting. The abstracts will be judged in advance to select the top two abstracts for oral presentation. The rest of the accepted abstracts will be presented as posters and judged at the poster presentation on Saturday, October 15. There are cash prizes!

Visit <http://ohioaccmeetings.org/am/poster/>

*If you submit a case study:

1. Case reports should be of a rare, unusual, or unexpected finding in a patient;
2. The diagnosis should be known or the workup as complete as possible (all evidence as to the diagnosis should be included);
3. There should be a brief review of the literature including numbers of patients with similar findings/outcomes, risk factors, how it has been evaluated/treated, and outcomes where known;
4. The case should include as much follow-up as is available;
5. Pathology slides and supporting evidence should be included.

Statement of Need

Cardiovascular disease is the leading health care problem throughout the world. In the United States alone, an estimated 70 million people have been diagnosed with one or more forms of cardiovascular disease (CV), and over 910,000 Americans die from CV disease each year. The cardiac care team is increasingly asked to develop systems of care, the methods for which are not necessarily part of the traditional medical training. We are asked to do this better, faster, more efficiently and at a lower cost.

Overall Goal

The overall goal of this activity is to increase learner competence by discovering strategies to anticipate research-driven changes in practice, to enhance professional growth, and to demonstrate efficacy in team based patient care practice as new clinical approaches and technologies change.

Learner Objectives

Upon completion of this program, participants should be able to:

- Recognize the impact of Health Care Reform legislation on the practice of cardiology.
- Address common problems unique to adult patients with resistant hypertension.
- Identify and determine the appropriate cardiovascular treatment and management options for patients undergoing treatment for cancer.
- Describe practice options and necessary steps to attaining a position to meet the needs of the cardiac patient population.
- Recognize and interpret hemodynamic findings in patients with complex cardiovascular disease.
- Maximize the net clinical benefit of antithrombotic therapy in preventing stroke in the setting of atrial fibrillation.
- Discuss the appropriate selection and use of cardiac CT and MRI imaging in patients with cardiac disease.
- Address and apply the guidelines and the treatment options available for the complex heart failure patient, including those with cardiorenal syndrome.

Target Audience

Adult Cardiologists, Pediatric Cardiologists, Cardiothoracic Surgeons, Cardiology Fellows-in-Training, Nurses, Nurse Practitioners, Clinical Nurse Specialists, Physician Assistants, Pharmacists

ACCF Disclosure & COI Policy Statement

ACCF/Chapter committee members, faculty, staff and other individuals who are in a position to control the content of this activity are required to disclose all real or apparent conflicts of interest. All relevant potential conflicts of interest that are identified are thoroughly vetted through a process that includes course directors and appropriate peer review by education committee chairs/members, for fair balance, scientific objectivity and validity, patient care and safety recommendations. Full disclosure will be published in the syllabus.

Accreditation

Physicians

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the American College of Cardiology Foundation and the Ohio Chapter of the American College of Cardiology. The American College of Cardiology Foundation is accredited by the ACCME to provide continuing medical education for physicians.

The ACCF designates this educational activity for a maximum of 5.75 AMA PRA Category 1 Credit(s)[™]. Physicians should only claim credits commensurate with the extent of their participation in the activity.

Nurses

American College of Cardiology Foundation is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

The ACCF designates this educational activity for a maximum of 5.75 continuing education hours. Requirement for successful completion is attendance at the program in its entirety and completing the evaluation tool.

While offering CME and CNE credits noted above, this program is not intended to provide extensive training or certification in the field.

Acknowledgment

At the time of printing, a complete listing of industry supporters was not available. Appropriate acknowledgment will be made upon confirmation of support and at the time of the program.
